

Ovid®

Forest Science Database

Rely on Ovid as the trusted solution that transforms research into results

Access to impartial information of high quality, recognizing worldwide interest in sustainable forestry, tropical deforestation, climate change, carbon sequestration, forest genetic resources and related issues.

Compiled by specialists at CABI, the weekly-updated database currently contains more than 1.1 million abstracts and citations dating back to 1939.

Providing access to years of research from all over the world, the Forest Science Database provides an ideal source for foresters, scientists, environmental consultants, policy makers and others actively involved in research or decision-making in agroforestry, forestry, wood science, and the forest and timber industries.

Key Facts

- Over 1.1 million bibliographic records with detailed keyword (metadata) tagging
- Over 30,000 full-text documents (journal articles, conference papers, reports)
- CAB Reviews, timely analysis written by subject experts
- News
- Events calendar of forestry conferences/meetings
