

ROYAL SOCIETY OPEN SCIENCE

ROYAL SOCIETY OPEN SCIENCE

royalsocietypublishing.org/journal/rsos

Royal Society Open Science publishes high quality research across all of science, engineering and mathematics. Its scope covers all articles which are scientifically sound, leaving judgement of importance and impact to the reader, without restrictions on scope, length or potential impact.

Article types include registered reports and evidence synthesis papers, and the journal encourages the submission of null studies and negative outcomes, as well as replication attempts/studies.

In 2020, the journal reorganised its subject sections, and launched a new section on Ecology, Conservation and Global Change Biology. It also issued a call for and pioneered rapid peer review of registered reports researching COVID-19.

Features Include:

- immediate open access, fully compliant with funder and institutional mandates
- continuous publication model, which allows immediate citation of articles
- accepts direct submissions and referred from other Royal Society journals
- publisher deposit of articles in PubMed Central
- successful ongoing collaboration with the Royal Society of Chemistry.
