Genetics in Medicine (GIM), the official journal of the American College of Medical Genetics and Genomics, is a monthly peer-reviewed genetics journal. GIM offers an international forum for the presentation of innovative, clinically relevant papers in contemporary genetic medicine. Stay tuned for cutting-edge clinical research in areas such as genomics, chromosome abnormalities, metabolic diseases, single-gene disorders, and genetic aspects of common complex diseases.

Addressing the needs of all involved in the field of Genetics

High Impact Factor
The latest impact factor (2020) of GIM is of 8.822*, ranking TOP 10%* in Genetics & Heredity journals.

Highly Cited & Referenced Content
GIM articles were cited 17,957 times in 2020.*

Science Direct Functionality
The journal content can be accessed via the ScienceDirect platform since Jan. 2022.

This Journal is in a Trial promo period for CNRS until 15th of April.

Genetics in Medicine is available for access via ScienceDirect.
